EXPERIENCE

Software Engineer, Credit Karma

MAY 2017 - PRESENT

Built 3rd party gateways to power product features, both user facing (50M+) and data based (e.g. modeling)

Mentored engineers in adoption of Functional Programming, ensured code patterns used were approachable and understood

Implemented and onboarded programming practices ensuring business logic was both readable and statically verifiable

Created and maintained stable test environment enabling engineers to stage changes and ensure integrations and deployments went smoothly

Implemented and launched the backend for the Savings product, which included keeping 20+ people synchronized and using 10+ microservices to power

Software Engineer, Human Interest

JUNE 2016 - MAY 2017

Full stack role using Node.js, React.js, and Golang

Created dockerized environment to make staging work simpler and deploys more predictable

Senior Backend Engineer, Sparkcentral

AUGUST 2015 - JUNE 2016

New feature development and migration from monolith to microservice

Data overhaul (storage, accuracy, speed) powering in-depth reporting

Go-to guy for troubleshooting new issues, timely fixes and non-technical explanations

EDUCATION

University of Manitoba — *Computer Science, Honours*

JANUARY 2007- JUNE 2012

SKILLS

Functional Programming

Pragmatic Agile

Troubleshooting / RCA

Automation

Testing & Staging

Continuous Integration

Complexity Management

Product Enhancements

New Product Initiatives

Developer Efficiency

Education & Mentorship

Entrepreneurship

Accountability

TECHNOLOGIES

Scala, PHP, JavaScript, TypeScript, Node.js, React.js, .NET, Objective-C, Python, Ruby, Java, MySQL, PostgreSQL, BigQuery, MongoDB, Docker, Kubernetes, AWS, Bash, Git, Mercurial
